

Tri-Link

IMPACT Humate

Guaranteed 82% Humic Acid (HPTA Certified) – 100 SGN

Tri-Link IMPACT Humate™ is a naturally occurring material derived from Humalite, an industry leading source of humic substances. IMPACT Humate™ guarantees 82% humic acid and is OMRI® Certified. This product can be applied directly to soil or blended with topdressing sand for use on turfgrass.

Industry certifications include:

For Use as a Soil Amendment

IMPACT Humate™ has a high cation exchange capacity, CEC (>200).

This product is for use in managed turfgrass systems and agricultural settings to improve overall soil characteristics.

- Increases cation exchange capacity (CEC)
- Stimulates microbial activity – reduces % organic matter
- Increases the availability of macro- and micronutrients for plant uptake as the result of nutrient chelation
- Improves seed germination and overall plant health
- Increases soil carbon
- Improves soil structure – increases infiltration and aeration

Suggested Application Rates

Turfgrass Applications	lbs./1000 ft² (lbs./A)
Greens (apply at aerification)	15-20 (650-870)
Tees and Fairways	8-12 (350-500)
Agricultural Applications	
Annually (2-4 applications)	8-12 (350-500)

CAUTION

KEEP OUT OF REACH OF CHILDREN

- Do not inhale or ingest product.
- May cause irritation to eyes and sensitive skin – flush eyes with water and wash skin.
- If irritation persists, seek medical attention.
- Mild irritation to mucous membrane and respiratory passages – move to fresh air and seek medical attention.
